**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 3, drawn to a film forming method for an optical multilayer filter, classified in class 427, subclass 10.
- II. Claims 4 and 5, drawn to a film forming apparatus for an optical multilayer filter, classified in class 118, subclass 712.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice, respectively.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another and materially different apparatus, such as an apparatus that does not include a chamber. Additionally, the apparatus as claimed can be used to practice another and materially different process, such as (1) a process in which only a single layer is deposited on a substrate, not an optical multilayer filter, or (2) a process in which layers on a substrate are etched to a predetermined  $\lambda/4$  layer thickness, not deposited to the aforementioned layer thickness.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and

Art Unit: 1762

recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Thomas Gallagher on 8/26/2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
